

erfan

is a multi-instrumentalist arranger/composer

biography

of said multi-instrumentalist arranger/composer

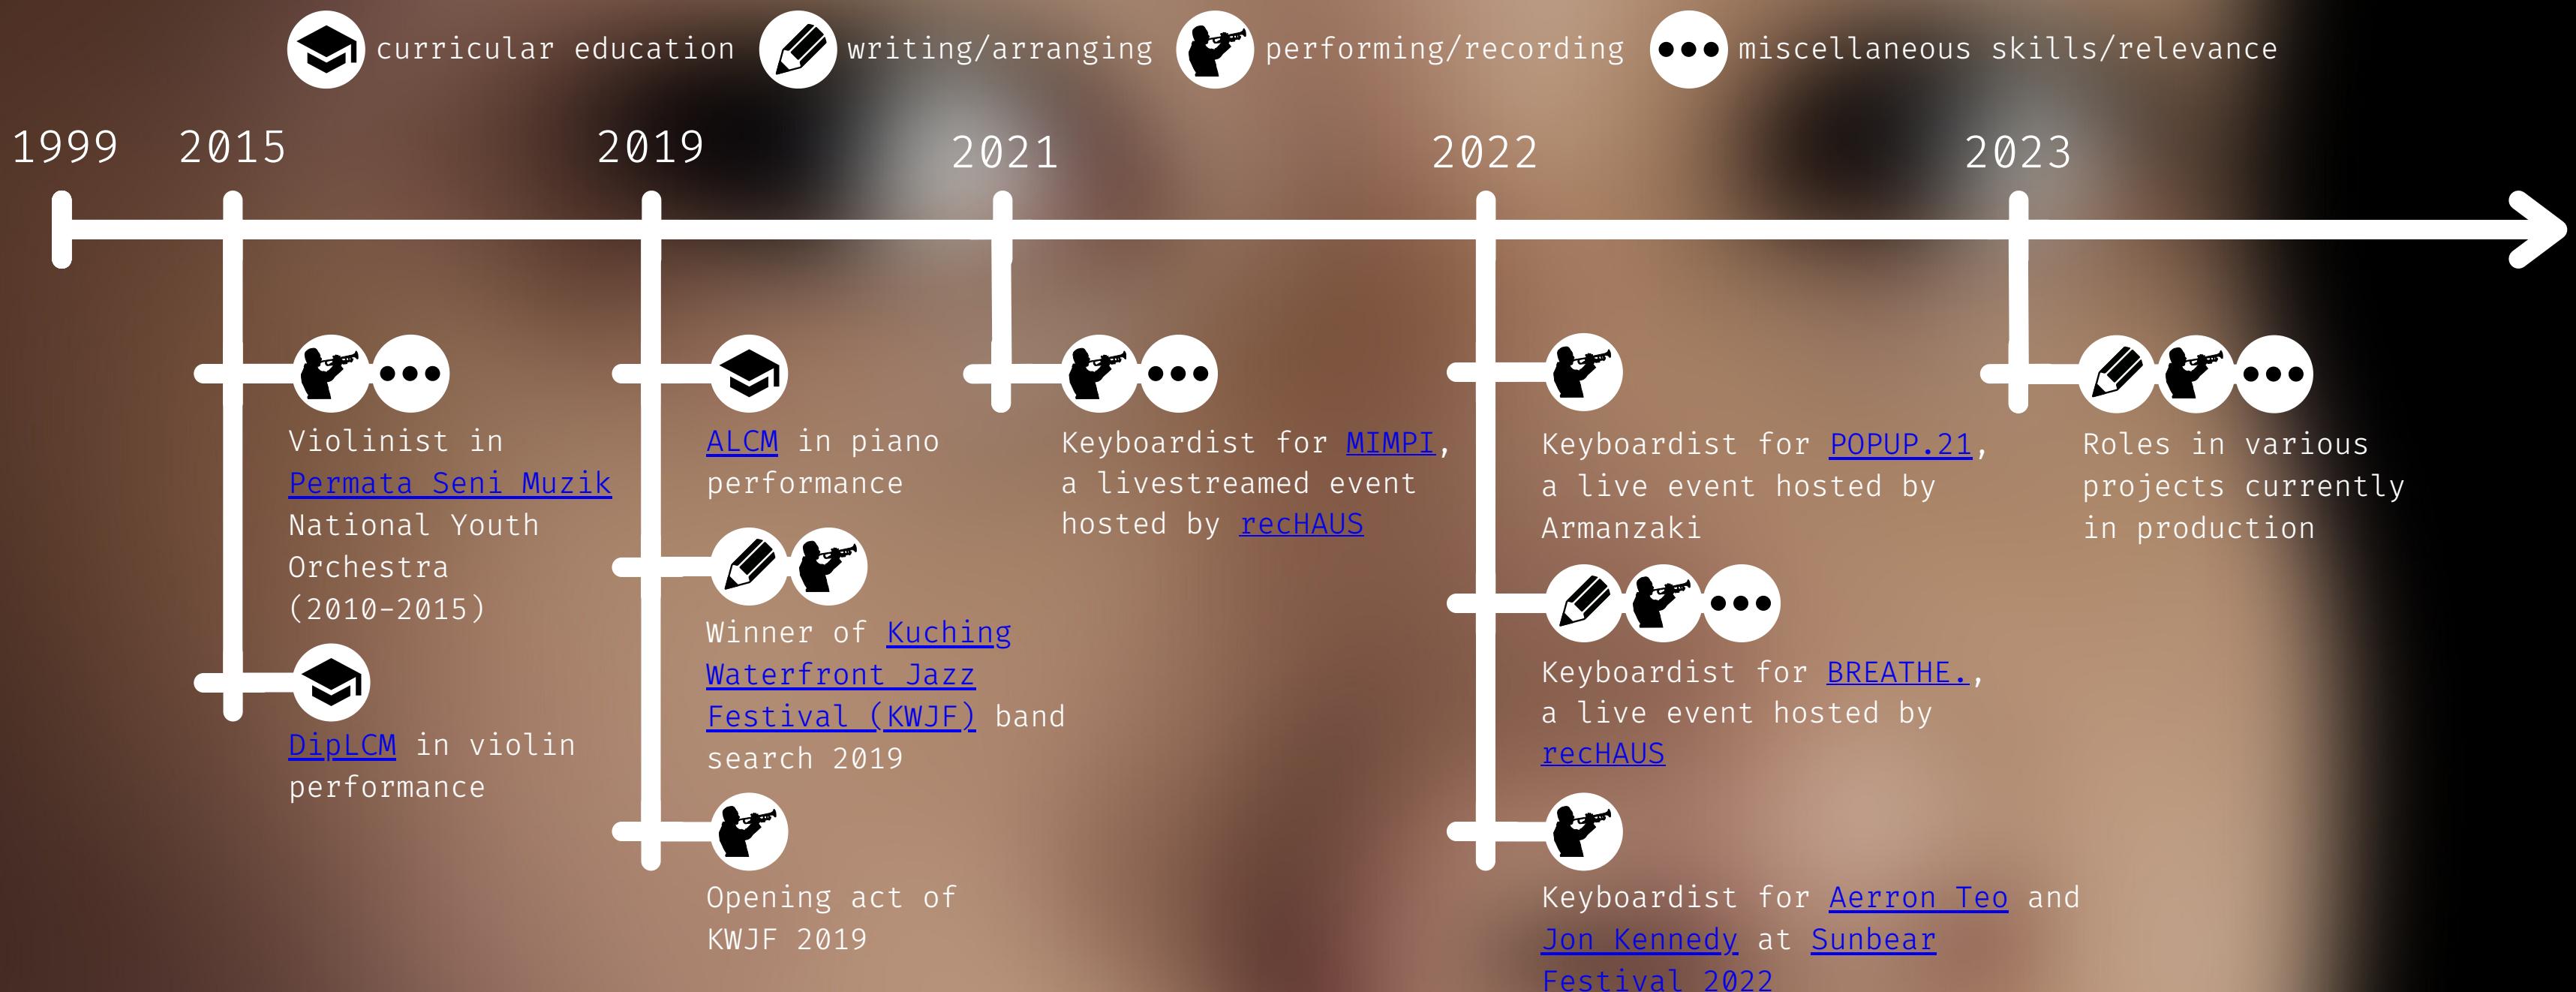

erfan started taking piano and violin lessons at around age 5 and is now finishing off a diploma in music performance at age 23. When he's not doing academic things he's taking on random gigs in the city he's in; Kuching, Sarawak.

He does whatever the jobs need him to do but finds himself drawing a lot from post-2000s mathrock, 80s citypop, 21st century fusion and cursed mashups in his playing and writing when given the freedom.

When he's not doing music, he's probably making things on his computer like videos, simple webapps, boardgame rulesets or personal website tweaks. Or he could be playing videogames.
